Ovulation induction

declaration code 14B192, product code 972804031, specification: hormone treatment in case of reduced fertility.

This declaration includes ultrasounds and the guidance of the use of hormones for the single purpose of inducing an ovulation.

Diagnostic laparoscopy/hysteroscopy

declaration code 16B180, product code 972804018, specification: Keyhole surgery and research in the uterus and/or abdominal cavity in case of reduced fertility.

This declaration includes the research in the uterus and/or abdominal cavity.

IUI-treatment

declaration code 14B191, product code 972804030, specification: Insertion of sperm cells in the uterine cavity in case of reduced fertility.

This declaration includes the ultrasounds if necessary and the insemination.

IVF/ICSI treatment phase 1

declaration code 14B187, product code 972804026, specification: IVF treatment or injection of sperm with stimulation in case of reduced fertility.

This declaration includes the stimulation and all tests and treatments in the period to the oocyte retrieval. Stimulation hormones will be charged to you separately.

IVF/ICSI treatment phase 1-2

declaration code 14B183, product code 972804022, specification: IVF treatment or injection of sperm with stimulation and oocyte retrieval in case of reduced fertility.

This declaration includes the stimulation and all tests and treatments in the period to, and including the oocyte retrieval. Stimulation hormones will be charged to you separately.

IVF treatment phase 3-4

declaration code 14B184, product code 972804023, specification: IVF treatment - laboratory operations, with or without embryo transfer in case of reduced fertility.

This declaration includes the laboratory phase, with or without embryo transfer and the possible freezing of embryos. In that case you will also be charged for the 'storage costs embryos'.

ICSI treatment phase 3-4

declaration code 14B184, product code 972804023, specification: injection of sperm and laboratory operations, with or without embryo transfer in case of reduced fertility.

This declaration includes the laboratory phase, with or without embryo transfer and the possible freezing of embryos. In that case you will also be charged for the 'storage costs embryos'.

IVF treatment complete

declaration code 14B173, product code 972804009, specification: IVF treatment with stimulation - oocyte retrieval - laboratory operations, with or without embryo transfer in case of reduced fertility.

This declaration includes the complete cycle; stimulation (including ultrasounds and blood tests if necessary), oocyte retrieval, laboratory phase with or without embryo transfer and the possible freezing of embryo's. In that case you will also be charged for the 'storage costs embryos'. Stimulation hormones will be charged to you separately.

ICSI treatment complete

declaration code 14B168, product code 972804004, specification: injection of sperm with stimulation - oocyte retrieval - laboratory operations, with or without embryo transfer in case of reduced fertility.

This declaration includes the complete cycle; stimulation (including ultrasounds and blood tests if necessary), oocyte retrieval, laboratory phase with or without embryo transfer and the possible freezing of embryo's. In that case you will also be charged for the 'storage costs embryos'. Stimulation hormones will be charged to you separately.

Cryo monitoring

declaration code 14D227, product code 972804036, specification: monitoring of the cycle in IVF-treatment or injection of sperm in case of reduced fertility.

This declaration includes consultations and ultrasounds in preparation on a frozen embryo transfer.

Cryo laboratory phase

declaration code 14D226, product code 972804035, specification: IVF-treatment or injection of sperm, with laboratory operations in case of reduced fertility.

This declaration includes the laboratory phase with or without embryo transfer.

Stimulation hormones:

Substance name	Brand name
menopauzegonadotrofine	Menopur, Meriofert
follitropine alfa	Bemfola, Gonal-F, Ovaleap
follitropine bèta	Puregon
corifollitropine alfa	Elonva
urofollitropine	Fostimon

Storage costs embryos and gametes

This declaration includes the storage of embryos, oocytes or sperm in liquid nitrogen. This amount will be charged to you every 3 months, you will receive the invoice at the beginning of the new storage period.

Exception: embryos resulting from a fresh IVF/ICSI treatment will be stored 3 months free.

If the storage is terminated within the billed period, no refund takes place.

Freezing oocytes, not on medical indication

This declaration includes the stimulation (including ultrasounds and blood tests if necessary), oocyte retrieval and laboratory phase. If the treatment cannot be completed, see 'IVF/ICSI phase 1 or phase 1-2'. If oocytes are frozen you will also be charged for the 'storage costs'.

Stimulation hormones will be charged to you separately.

Costs oocyte bank MCK

This declaration includes the use of oocytes from the oocyte bank of MCK; the costs of the recruitment, screening and treatment of the donatrice. You pay this amount per 4 oocytes. If after defrost there are only 3 good oocytes, you are entitled to a refund of $\frac{1}{4}$ of the full amount. If embryos are frozen you will also be charged for the 'storage costs'.

Costs embryo bank MCK

This declaration includes the medical and psychological screening of the donor(s), the transport of the embryo and the storage in liquid nitrogen of the donor embryo reserved for you. This amount will be charged to you per embryo.

Costs embryo of private donor

This declaration includes the medical and psychological screening of the donor(s), and de storage in liquid nitrogen up to the embryo transfer (up to one year). This amount will be charged to you once. Starting from a possible second storage year you will also be charged for 'storage costs'.

Costs sperm bank MCK

This declaration includes the use of sperm from the sperm bank of MCK; the costs of the recruitment, screening of the donors, the freezing of the sperm and the storage of the sperm, reserved for you. You will pay this amount per treatment. In addition you will pay for the IUI or IVF/ISCI treatment.

Costs treatment private donor

This declaration includes the complete examination of the 'private sperm donor' (someone who donates only for you), blood and urine tests, (3x) freezing of ejaculates, quarantining en preservation for treatment of the donor sperm. In addition, the storage of the sperm up to 1 year after the donations is included. If more than three ejaculates will be frozen, please see 'costs for freezing extra ejaculate'. Please note, this feature applies only before the blood test for releasing the sperm.

Costs treatment private donor; additional freezing

This declaration includes the blood and urine tests, (3x) extra freezing of ejaculates, quarantining en preservation for treatment of the donor sperm. In addition, the storage of the sperm up to 1 year after the donations is included. This amount will be charged to you when the stock runs out or when it is for any other reason desirable to built up an extra stock.

Freezing sperm for own use or for a treatment

This declaration includes the consultation and the freezing of the first ejaculate. In addition, the storage of the sperm up to 1 year after the donation is included. If it turns out to be not suitable to freeze sperm, the storage costs will be refunded. If you want to freeze more ejaculates, see 'costs for freezing an extra ejaculate'. Starting from a possible second storage year you will also be charged for 'storage costs'.

Costs for freezing an extra ejaculate

This declaration includes the freezing of an extra ejaculate for own use or for a treatment. Please note, this feature applies only within one year after freezing the previous ejaculate. In case of a private donor, the freezing has to take place before the blood test for releasing the sperm.

Sperm analysis

This declaration includes the determination of volume, viscosity, density, pH, motility of spermatozoa, number and aspect of the round cells.

Additional surcharge for clients from abroad

This declaration includes the extra costs we make for clients from abroad because the treatment requires more organization and coordination than for clients who live in the Netherlands. As these additional costs have not been included in the officially set tariffs we are forced to pass them on to you. This fee must be paid before the first visit to our clinic. You will get a refund if there will be no further treatment after the first visit.

Costs transport straws

This declaration includes the costs (reception and customs clearance, inspection, registration and issuance) that occur if, at your request, straws will be transported; this concerns both inbound, outbound, and internal transport (the transfer of straws to another client). This amount will be charged to you per transport.

Costs no show

This declaration includes the legal 'no show' rate. These costs will be charged to you if you do not cancel your appointment at least 24 hours in advance.

Ovulation tests

This declaration includes the supply of 10 digital ovulation sticks. You can buy these tests at the secretariat.

Refund of your payment

If you, according to this rate list, are entitled to get a refund, please report it by sending an email to: debiteuren@mckinderwens.nl, stating your name, date of birth, address, your IBAN and the reason for the refund. If the name corresponding with your bank account is not your name, please also mention the name of your bank account.
